

# What is Claims eTracker™?

**Claims eTracker™** uses the web to provide a simple system for providers to transfer data from their office to your location and for you to inform them of processing status including the need for resubmits, additional information, etc.

**Claims eTracker™** provides the following benefits:

- **Easy-to-use** web interface
- Providers use **simple** file pick dialogue for choosing claims files to submit.
- **Multiple** file **statuses** so provider, processor and management know the state of all files.
- **Automatic emailing** at every status change.
- Ability to **add notes** to any file and email to appropriate person.
- Each provider has an **assigned processor**.
- Processors **retrieve multiple files** with one button click
- **Processor comments** and notes can be returned with reports to providers.
- Complete **transaction history** including date of submission, date completed, and requests for resubmits
- **Automatically date stamps** files, eliminates questions of submission date.
- Allows **multiple file submissions** per day from the same provider.
- Combine with **Claims Workbench™** for a permanent copy of all submitted claims.
